Education

- 2025 – 2028  **PhD in Applied Mathematics, Université Côte d'Azur, France.**
- Subject: *Adaptive methods for Distributionally Robust Optimization (DRO)*
- Supervisors: Yassine Laguel and Samuel Vaiter
- 2023 – 2024  **Double Master 2 in Mathematics and Computer Science, Université Gustave Eiffel, France.**
- Awarded Labex - Bézout fellowship.
- Thesis: *Revisit the Sinkhorn barycenter problem* (final result: 16/20).
- Graduated with **high honors**, GPA **14.976/20**.
- 2022 – 2023  **Master 2 in Applied Mathematics, Université de Rennes, France.**
- Thesis: *A new numerical approach to stiff ODEs using adaptively optimal time-step*.
- Graduated with **highest honors**, GPA **16.83/20**.
- 2017 – 2021  **Bachelor in Mathematics Teacher, Ho Chi Minh City University of Education, Vietnam.**
- Thesis: *A numerical method to solve the Cauchy problem of 1D Euler fluid dynamic equations*.
- Graduated with **high honors** in major *Analysis and Applied Mathematics*, GPA **8.16/10**.
- Second prize in Mathematics Faculty's student research competition in 2021.
- 2014-2017  **Vietnamese Scientific baccalaureate specializing in Mathematics, Gia Dinh High School, Vietnam.**
- First prize in city-level Math Contest for 12th-grade students in Ho Chi Minh City.

Interests

Optimization, Optimal Transport, Machine Learning.

Experiences

- 09/2025 – 08/2028  **Doctoral research** - LJAD (CNRS) and 3IA Côte d'Azur, Nice, France.
Current project: *Smooth Quantile - An efficient method to optimize nonsmooth nonconvex least quantile with applications in robust machine learning.*
Supervisors: Yassine Laguel and Samuel Vaiter
- 03/2025 – 07/2025  **Data Scientist** - New IT Services, Ho Chi Minh City, Vietnam.
Activities: Design and implement the Stock-Acquisition Management (SAM) model to drive precision and efficiency in optimizing supply-demand systems.
- 04/2024 – 08/2024  **Master 2 Internship** – LIGM, Université Gustave Eiffel, France.
Subject: *Revisit the Sinkhorn barycenters problem - Investigating the ill- conditioned in optimization problem.*
Supervisors: Théo LACOMBE
- 03/2023 – 06/2023  **Master 2 research internship** - INSA Rennes, France.
Topic: *A New Numerical Approach to Stiff ODEs Using Complementarity Conditions.*
Supervisors: Prof. Mounir Haddou, Dr. Ibtihel Ben Gharbia, Prof. Quang Huy Tran.
- 05/2021 – 05/2022  **Mathematics Teacher for high school students** - Titan Education Center, Vietnam.
- 09/2020 – 04/2021  **Research assistant** - Ho Chi Minh University of Education, Vietnam.
Topic: *A numerical approach to two-dimensional Euler's fluid dynamic equations using the dimensional splitting method.*
Supervisors: Dr. Dao Huy Cuong.

Skills

Theoretical	■ Numerical Optimization, Distributionally Robust Optimization, Optimal Transport, Machine Learning.
Technical	■ Python (Numpy, Pandas, Scikit-learn, Pytorch Matplotlib), Matlab.
Language	■ Vietnamese (native), English (proficient), French (beginner).
